Jerry Super Harp Seal Omega-3

- *Help lower cholesterol levels, lower triglycerides to maintain a healthy heart and cardiovascular system*
- *Helps support the development of the brain, eyes and nerves in children and adolescents*

Jerry Super Harp Seal Omega-3 is PCBs free product and is rich in Omega-3 long-chain polyunsaturated fatty acid EPA, DHA, DPA as well as natural anti-oxidant Squalene. It helps lower cholesterol levels, lower triglycerides to maintain a healthy heart and cardiovascular system. It also helps control blood sugar levels and is essential for the development and execution of the function of the brain and optical nerve, so it has an appreciable effect on the development of children's quotient of intelligence (I.Q.).

Jerry Super Harp Seal Omega-3 is licensed natural health product by Health Canada. **The NPN is 80008880.**

Nutrition Recommendations for Canadians recommended that each adult should take a total of 1.5 g of Omega-3 fatty acids daily in order to maintain good health, normal growth and development.

Why Jerry Super Harp Seal Omega-3 is better than Fish Oil Omega-3?

(1).The absorption of Jerry Super Harp Seal Omega-3 into human body is easier than fish oil Omega-3. (2). Jerry Super Harp Seal Omega-3 is free of cholesterol, while many fish oils are relatively high in cholesterol. (3). Jerry Super Harp Seal Omega-3 has three Omega-3 components EPA, DHA and DPA, but most fish oils only have two components EPA, DHA and no DPA. DPA is said to be ten times more effective in healing damaged blood vessels than EPA. (4). Fish oils are susceptible to oxidation whereas Jerry Super Harp Seal Omega-3 is more resistant to natural oxidative processes. (5).The Omega-3 content of Jerry Super Harp Seal Omega-3 product is 20%-25%, which is higher than most fish oils, making Jerry Super Harp Seal Omega-3 capsules a much more effective source of Omega-3 than fish oils.

 **Jerry Super Harp Seal Omega-3** tends to lower cholesterol and may also help the body maintain proper levels of HDL cholesterol (the "good" cholesterol), and then reduce the levels of LDL cholesterol (the "bad" cholesterol).

DIRECTIONS: Adults take two to four capsules one time per day, adolescents and infants take two capsules two times per day.
